

Bassersdorf January 2023

Compliance with REACH , RoHS and CLP Directives

EC 1907/2006 REACH

Regulation of the European Parliament and of the Council of 18 December 2006

REACH stands for "Registration, Evaluation, Authorisation and Restriction of Chemicals".

We asked our suppliers about the presence of critical substances in our products. Based on this information, we confirm that with the exception of lead*, our products do not contain any substances with more than 0.1% by mass on the REACH candidate list.

* Rotronic products may contain partial products with lead. However, these partial products comply with the exceptions of the RoHS Directive mentioned below.

RoHS Directive 2011/65/EU amended by 2015/863/EU (Directive on the restriction of certain hazardous substances)

Based on the information provided by our suppliers, we certify that our products comply with Directive 2015/863/EU.

In this context, our suppliers make use of the exceptions listed herein for products with plug-in and solder contacts, products that contain turned brass parts and for our electrical and electronic components:

- Annex III 6a (lead as an alloying element in steel for machining purposes and in galvanized steel with a maximal lead content of 0.35 %)
- Annex III 6c (lead in copper alloys with a maximum content of 4%)
- Annex III 7a (lead in high-melting solders)
- Annex III 7c (lead-containing electrical and electronic components in glass or ceramic materials except dielectric ceramics in capacitors or in a glass or ceramic matrix compound)
- Annex IV (sensors, detectors, electrodes and others)

CLP Regulation (EC) No 1271/2008

(Regulation on classification, labelling and packaging of substances and mixtures)

We confirm that we comply with CLP Regulation (EC) No. 1271/2008 for proper classification, labelling and packaging of hazardous chemicals before and during the placing on the market.

You can download our [safety data sheets](#) from our website.

We update and publish this declaration on our website every six months. This fulfils our obligation to pass on information on substances in our articles.
