

REACH Compliance Declaration

Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

Michell Instruments Ltd is a manufacturer of moisture measurement and gas analysis instrumentation. These products consist of "articles" as defined under the REACH Regulation (EC) No. 1907/2006.

The REACH Regulation defines an article as: "an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition".

Michell Instruments Ltd has to fulfill its obligations under Article 33 REACH and will inform the recipients of its products that contain Substances of Very High Concern (SVHC) over 0.1% weight by weight (w/w) at the smallest article level. Please refer to the [ECHA Candidate List](#) for the latest list of SVHCs.

The latest update of the Candidate Lists was issued on **January 17th 2023**. This declaration advises compliance with the latest update.

Michell Instrument's products do not contain articles with SVHCs over the 0.1% (w/w) threshold.

Michell Instruments Ltd does not produce or import any substances contained in articles in quantities over 1 tonne per year, therefore, Article 7 is not applicable, and do not have to register these articles to the European Chemicals Agency (ECHA).

As Michell Instruments Ltd are based outside of the EU, there are no requirements to submit information to the Substances of Concern In Products (SCIP) database established under the Waste Framework Directive (WFD), nor for the creation of material safety data sheets (MSDS) for the articles it creates.

Michell Instruments Ltd endeavours to follow the requirements of the REACH Regulation and Waste Framework Directive in terms of our complex products and to provide SVHC information at the smallest article level that is practical and technically feasible, to the best of our knowledge as derived from our supply chain operators. This information is transmitted here in good faith and based solely upon the information which our suppliers have provided to us.

Under the normal and reasonably foreseeable circumstances, no articles manufactured by Michell Instruments Ltd contain any SVHC in quantities greater than the permitted 0.1% w/w or 0.01% w/w as applicable per Article.

Michell Instruments Ltd's continued review of the SVHC Candidate List and latest additions to it ensure it remains compliant.
