

Performance data

(Typical values relative to cells stored for one year or less at 30°C max.)

- Nominal capacity 2200mAh
(at 3mA, +25°C, 2.0V cut-off)
- Open circuit voltage 3.66V
- Maximum recommended continuous current 400mA
- Max. pulse current 1000mA
1000mA/0.1s pulses, drained every 2 minutes at 25°C from 3mA mid-discharged cells with 20μA base current, yield voltage readings above 2.7V. The readings may vary according to the pulse characteristics, the temperature, and the cell's previous history.
- Operating temperature range -55°C~+80°C

Typical discharge curves at 25°C

Capacity vs. Current (2.0V cut-off)
