**Position:** Final Preparation Assembler

**Office:** Michell Instruments UK

**Departments:** Operations

## Job

### Description:

#### **Final Preparation Assembler**

We have an interesting role in our Final Preparation Team for an enthusiastic candidate. Working in our manufacturing assembly area configuring various types of instrumentation, accessories and transmitters, for a company with a global reputation for providing high quality instrumentation, process analyzers and industrial hygrometers.

#### **Key responsibilities**

- Working from a prioritised daily schedule.
- Final configuration, including some mechanical assembly of various instrumentation products and Dew Point Transmitters to our customer requirements
- Occasional pressure testing of portables
- Print out and verify calibration certificates
- As there are several different combinations within our product range the ability to configure these accurately is essential
- Follow on screen work instructions to ensure product quality is maintained
- Enter transactions on the ERP system
- Keeping work areas clean and organized while working to lean principles and 5s standards.

#### **Personal qualities**

- Enthusiastic with good communication skills
- A positive approach to continuous improvement
- Desire to produce work to a very high standard of quality
- Flexibility to adapt to varied nature of work and workload

- Excellent manual dexterity
- Soldering skills could be an advantage
- Meticulous attention to detail and record keeping

Experience in a similar role is preferred with a willingness to learn.

**Expires:** 31/05/2022
