

4 July 2022

Position: Applications Test Technician

Office: Michell Instruments UK

Departments: Marketing

Job Description: JOB SPECIFICATION

Description: APPLICATIONS TEST TECHNICIAN

The Opportunity

Due to continuing Company growth a Test Technician is required in the Applications team. The successful candidate will be involved in determining the performance of newly developed physical sensors and application-specific testing of existing products.

Reporting to the Applications manager the key responsibilities for the role include:

- Set up and run of experiments to gather performance data on new and existing sensors
- Processing of test data
- Involvement in performance analysis

Required Personal Qualities

The successful candidate will be expected to demonstrate the following qualities:

- An attention to detail and patience to ensure intricate work is completed to a high standard
- A high degree of self-motivation and the ability to work without close supervision on larger projects
- Excellent communication skills, as you will need to work with people of all abilities and levels within the business
- Flexibility and willingness to learn

Key Skills

- Assembly of intricate mechanical and electrical components
- Able to compose and understand technical documentation
- Able to follow test plans and procedures
- Data collection and preparation
- Data analysis using Microsoft Excel

Education and Experience

The successful candidate is likely to have a qualification equivalent to NVQ level 3 (or above) focused on a STEM subject. Experience in small research groups or start-up companies would be highly advantageous. Demonstratable hands-on practical skills either through a hobby or experience are required.

Remuneration

The role offers a competitive remuneration and benefits package. It is based at the Company's business headquarters which are in Ely, Cambridgeshire.

About the Employer

Michell Instruments is a dynamic and rapidly growing organization offering a rare combination of job security and excellent career opportunities. Serving industries as diverse as petrochemical and pharmaceutical through to power generation and food processing. The Company is an international leader in high-precision sensing with over 45 years' experience in the field and is renowned as a specialist in instrumentation for dew point, relative humidity, and oxygen analysis.
